

BINARY LESSON plan

grade: **Secondary 3-4**

duration: **40 min**

subject: **Computing**

lesson topic: **Learning Binary & Decimal Systems**

learning objective/s:

- Understand binary and decimal number systems.
- Learn how each bit represents a value.
- Practice converting between binary and decimal numbers.

materials needed:

- Binary Quiz Kit
- Power supply / USB-C cable.

lesson structure:

Introduction (5 min)	Briefly explain binary and decimal systems; relate to real-world examples.
Learning Mode (10 min)	Use the kit's Learning Mode slides to explain concepts; allow students to navigate.
Quiz Mode (20 min)	Students take turns answering questions; instant feedback via audio and visuals.
Discussion & Wrap-up	Review answers, clarify mistakes, and highlight real uses of binary.

Key Learning Points:

- Summarize the main takeaways students should remember after the lesson.
- Example:
 - Binary uses only 0 and 1.
 - Each position represents a power of 2.
 - Decimal is base 10 with digits 0-9.
